

Appgate SDP Security Advisory

ID: 2022-08-0003

First published	2022-08-25
Last updated	2022-08-25

Title

Host Header Poisoning in Management Interface

Summary

An attacker can trick the Controller into sending a redirect response against a malicious host.

Severity

Medium (CVSS 4.3)

Products Affected

Appgate SDP Controllers versions prior to 5.5.8 and 6.0.1.

Suggested Action

Upgrade Appgate SDP Controllers to version 5.5.8 or 6.0.1 or later.

Workaround and Mitigations

The applicability is low because none of the common and high-risk issues could be exploited during penetration testing.
